

Play Ball Kidz Recreation Program

The Play Ball Kidz program is a 10 week, multi-component recreation intervention designed to improve the gross motor skills and social skills of high-functioning 5 to 12-year-old children diagnosed with Autism Spectrum Disorder (ASD).

Play Ball Kidz captivates children with its hands-on learning environment and opportunities to practice and learn new skills each week. Each session provides scaffolding, land marking and cooperative games designed to help children learn new gross motor and social skills in a fun environment.

Parents and schools are an integral part of the group program and receive resources and support to help young athletes develop and practice new skills at home and at school.

Topics of Instruction:

- Talking and playing with others
- Joining in conversations and activities with others
- How to cope with making mistakes, changes in routine and feelings of uncertainty
- How to handle new situations and learning to ask for help
- Solving social problems
- How to recognize simple and complex emotions in themselves and others
- How to express feelings in appropriate ways
- How to cope with feelings of anger and anxiety

What are the participation requirements?

- Child must have a diagnosis of Autism Spectrum Disorder
- Child must have verbal communication skills and an IQ within a normal range (or above)
- Child must be able to participate in a group setting without additional support beyond that provided within the program
- Child is able to attend weekly sessions for a 10-week period; lack of attendance may effect eligibility in future programs
- Caregiver must be able to attend parent session; 1 of the 10-week period (TBA)
- Demonstrates emerging social skills (interest in engaging with peers, attempts to verbally communicate, manages emotions in a non-aggressive way) and an interest in building relationships with same-aged peers and peers with common interests
- Children must be between 5 to 12 years of age
