

Connecting a SCDSB Chromebook to A Home WiFi Network + Logging In

Accessing the Chromebook WiFi Settings

1. Turn on the school Chromebook.
2. At the login screen, move your mouse to the bottom right hand corner.
3. Click on the **wireless**  icon to view a grouping of Chromebook settings.

4. Choose the '**Not connected**' button.
5. From the drop down choose "**Join WiFi network**".

Note: When at the login screen, the Chromebook may automatically try to join a wireless network. Choose "**Join WiFi network**".

Join the Chromebook to Your Home Wireless Network

Join WiFi Network

Type in **or choose your WiFi** network.

Security

Choose the appropriate security type in the drop down list for your home network. (Note that this may auto populate based on entering your home WiFi network name). Not sure which option to choose? Contact your internet provider for further assistance.

Password

Type in your WiFi network password. Click **Connect** when finished. You're all set!

Log into the Chromebook with a SCDSB User Account

Now that the Chromebook is connected to a home wireless network, please log in using your SCDSB account username and password.

1. Enter in your **username** (IE. User1234)
2. Choose **Next**. (Notice the @scdsb.on.ca is already entered).
3. Enter your password, choose **Login**.
4. Choose a profile picture, click **OK**.

You are now ready to start using the Chromebook

NOTE: After completing these steps, the Chromebook should automatically connect without needing to reconnect to your home wireless.

Your Future... Our Priority
