## eLearning Courses

The Simcoe County District School Board partners with school boards throughout Ontario to offer many courses in an online format. Online courses begin and end with a regular school semester and must be chosen at course selection time.

*\*A letter of intent acknowledging that delivery and student expectations for e-learning courses is different than face-to-face courses must be completed by each student. Students can access the letter of intent for completion from the guidance/student services office.*

### To be successful in eLearning, students must:

- log in and interact with their course daily
- interact with other students in the discussion area, including small group collaboration
- expect to spend 75 minutes each day plus homework time

### Things to remember when taking an eLearning course:

- Students with online courses will have a “Study Period” with no direct supervision at NPSS. It is expected that they work in the Career Centre, Guidance, the library or at home
- Attendance is taken on-line and is based on submitting assignments and logging into the website daily
- A student will be marked absent if they do not complete the required activities in a given week
- Students will be removed from courses for non-attendance
- Teachers will connect with students through email and online discussions
- It is the student’s responsibility to provide NPSS with a copy of final report card so the mark can be added to the transcript
- All correspondence will be sent to the student’s SCDSB email. It is the student’s responsibility to check this regularly

---

## Online Courses 2022-2023

For a list of potential online courses offered through other Ontario School Boards , please see the website below:

<https://prism.elearningstudents.ca>

Click to view the most current course offerings for the current (or next) school year. When prompted to choose a school board, select “ALL BOARDS” for an exhaustive list of offerings. For more course information, including a detailed description as well as any prerequisite course requirements, use a search engine to look for the “course title” and “curriculum expectations”.

---

## Summer School Courses 2022

All summer school registrations must be completed through your guidance counselor. Lists of potential courses can be found through the following link:

[The Learning Centre-Summer School](#)

Registration opens in May 2022. Courses run both July and August

The SCDSB also partners with **Edutravel**, an independent travel company that offers credit-based learning opportunities for summer and March break for a fee. Please visit [Edutravel](#) for possible opportunities. Registration is completed through the Edutravel website, and additional registration requirements must be completed through a guidance counselor

---

## Night School 2022-23

Night school runs throughout the semester and is offered at the Barrie Learning Campus (virtual and face-to-face). All registrations must be completed through your guidance counselor. A list of potential night courses can be found through:

[www.thelearningcentres.com/adult-student/night-school](http://www.thelearningcentres.com/adult-student/night-school)

Registrations must be completed during the first 2 weeks of the semester start.

## SPECIALIST HIGH SKILLS MAJOR (SHSM) PROGRAM HEALTH & WELLNESS

The Specialist High Skills Major (SHSM) program in Health and Wellness provides grade 11 and 12 students with an opportunity to focus their learning on an employment sector and gain valuable work experiences.

The SHSM program has a number of required components designed to give students a “leg up” to pursue post-secondary opportunities in the workplace, apprenticeship, college and university pathways in a variety of employment sectors.

In addition to the 4 “Major Credits”, 2-3 “Supporting Credits” and 2 credits in Co-operative Education, students earn industry-recognized certifications increasing confidence in their ability to succeed and see the connections between their academic studies, the world beyond highschool and future careers.

### HEALTH & WELLNESS

The Health and Wellness SHSM Program at Nottawasaga Pines supports students interested in pursuing a career in health and wellness including some of the following careers:

- ☐ Primary health practitioners
- ☐ Audiologists and speech-language pathologists
- ☐ Chiropractors
- ☐ Dentists
- ☐ Dietitians and nutritionists
- ☐ Family, marriage, and other related counsellors
- ☐ Optometrists
- ☐ Pharmacists
- ☐ Psychologist
- ☐ Teacher
- ☐ First Responders-Police, Fire and Ambulance
- ☐ Registered nurses and registered psychiatric nurses
- ☐ Specialist physicians
- ☐ Early childhood educators
- ☐ Social and community service workers
- ☐ Dental hygienists and dental therapists
- ☐ Massage therapists
- ☐ Medical laboratory technicians
- ☐ Respiratory therapists

Students will gain valuable industry-recognized certifications and training for FREE, including:

- ☐ Standard First Aid
- ☐ Mental Health First Aid
- ☐ Cardiopulmonary Resuscitation (CPR)
- ☐ Infection Control
- ☐ Workplace Hazardous Materials Information System (WHMIS)
- ☐ Concussion Awareness
- ☐ Equity and Inclusion
- ☐ Dietary Considerations
- ☐ Child Safety and Injury Prevention
- ☐ Conflict Resolution
- ☐ Behaviour Management
- ☐ Communication Skills
- ☐ Stress Management

- ☐ Non-Violent Crisis Intervention
- ☐ Wrapping and taping for performance and injury
- ☐ Mental Health Awareness
- ☐ Sign Language

Enrollment into the program begins at the end of the student's grade 10 year. Students must complete an application and be interviewed by a member of the SHSM teacher team to gain admission into the program. For more information regarding the program, please contact Jennifer Mansfield-Oehm , ([jemansfield@scdsb.on.ca](mailto:jemansfield@scdsb.on.ca)) in the Guidance Office.

## SPECIALIST HIGH SKILLS MAJOR (SHSM) PROGRAM HOSPITALITY & TOURISM

*PENDING MINISTRY OF EDUCATION APPROVAL*

The Specialist High Skills Major (SHSM) program in Hospitality and Tourism provides grade 11 and 12 students with an opportunity to focus their learning on an employment sector and gain valuable work experiences.

The SHSM program has a number of required components designed to give students a “leg up” to pursue post-secondary opportunities in the workplace, apprenticeship, college and university pathways in a variety of employment sectors.

In addition to the 4 “Major Credits”, 2-3 “Supporting Credits” and 2 credits in Co-operative Education, students earn industry-recognized certifications increasing confidence in their ability to succeed and see the connections between their academic studies, the world beyond highschool and future careers.

### HOSPITALITY & TOURISM

The Health and Wellness SHSM Program at Nottawasaga Pines supports students interested in pursuing a career in health and wellness including some of the following careers:

- ☐ Bakers
- ☐ Butchers, meat cutters, and fishmongers
- ☐ Chefs
- ☐ Conference and event planners
- ☐ Cooks
- ☐ Accommodation service managers
- ☐ Conference and event planners
- ☐ Food service supervisors
- ☐ Professional occupations in advertising, marketing, and public relations
- ☐ Restaurant and food service managers
- ☐ Travel counsellors
- ☐ Biologists and related scientists
- ☐ Dietitians and nutritionists
- ☐ Inspectors in public and environmental health and occupational health and safety

Students will gain valuable industry-recognized certifications and training for FREE, including:

- ☐ Standard First Aid
- ☐ Customer Service
- ☐ Cardiopulmonary Resuscitation (CPR)
- ☐ Workplace Hazardous Materials Information System (WHMIS)
- ☐ Fire Safety and Fire Extinguisher Use
- ☐ Cook/ line cook
- ☐ Guest Services
- ☐ Dietary Considerations
- ☐ Cash handling and register training
- ☐ Event Coordinator
- ☐ Food Handler Certification
- ☐ Infection Control
- ☐ Introduction to Hospitality Management
- ☐ Spa Service
- ☐ Safe Food Handling
- ☐ Smart Serve

Enrollment into the program begins at the end of the student's grade 10 year. Students must complete

an application and be interviewed by a member of the SHSM teacher team to gain admission into the program. For more information regarding the program, please contact Jennifer Mansfield-Oehm , ([jemansfield@scdsb.on.ca](mailto:jemansfield@scdsb.on.ca)) in the Guidance Office.

# GRADE 9 COURSES

## **The Grade 9 Program (8 credits)**

All students must take the following **5 courses**:

**English** (Locally Developed or Academic)

**Mathematics** (Locally Developed or De-streamed)

**Science** (Locally Developed or De-streamed)

**Geography** (Academic Accommodated or Academic)

**French** (Open or Academic)

**plus**

**3 elective courses of their choice** from grade 9 courses offered by various Departments.

## **ARTS**

### ***ATC101: Dance, Open***

This course gives students the opportunity to explore their technical and compositional skills by applying the elements of dance and the tools of composition in a variety of performance situations. Students will generate movement through structured and unstructured improvisation, demonstrate an understanding of safe practices with regard to themselves and others in the dance environment, and identify the function and significance of dance within the global community.

### ***ADA101: Dramatic Arts, Open***

This course provides opportunities for students to explore dramatic forms and techniques, using material from a wide range of sources and cultures. Students will use the elements of drama to examine situations and issues that are relevant to their lives. Students will create, perform, discuss, and analyze drama, and then reflect on the experiences to develop an understanding of themselves, the art form, and the world around them.

### ***AMI101: Music Instrumental, Open***

This course emphasizes the creation and performance of music at a level consistent with previous experience and is aimed at developing technique, sensitivity, and imagination. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop an understanding of the conventions and elements of music and of safe practices related to music, and will develop a variety of skills transferable to other areas of their life.

### ***AVI101: Visual Arts, Open***

This course is exploratory in nature, offering an overview of visual arts as a foundation for further study. Students will become familiar with the elements and principles of design and the expressive qualities of various materials by using a range of media, processes, techniques, and styles. Students will use the creative and critical analysis processes and will interpret art within a personal, contemporary, and historical context.

## **BUSINESS STUDIES**

### ***BTT1O1: Information and Communication Technology in Business, Grade 9, Open***

***\*This course is offered every other year\****

***Next offered in 2022-2023***

Want to develop your computer skills using a variety of software programs? This is the course for you as you prepare to be an effective and valuable employee using technology in the workplace.

This course introduces students to information and communication technology in a business environment as they build a foundation of digital literacy skills that are necessary for success in today's society. Students will become more proficient using word processing, spreadsheet, desktop publishing and presentation design software. Throughout the course, there is an emphasis on digital literacy, electronic research, as well as examining current issues related to the impact of information technology.

### ***BBI1O1: Introduction to Business, Grade 9, Open***

***\*This course is offered every other year\****

***Next offered in 2023-2024***

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

## **CANADIAN AND WORLD STUDIES**

### ***CGC1D1: Issues in Canadian Geography, Academic***

This course examines interrelationships within and between Canada's natural and human systems and how these systems interconnect with those in other parts of the world. Students will explore environmental, economic, and social geographic issues relating to topics such as transportation options, energy choices, and urban development. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate various geographic issues and to develop possible approaches for making Canada a more sustainable place in which to live.

### ***CGC1DB: Geography of Canada, Accommodated***

This course focuses on geographic issues that affect Canadians today. Students will draw on personal and everyday experiences as they learn about Canada's distinct and changing character and the natural and human systems and global influences that shape the country. Students will use a variety of geotechnologies and inquiry and communication methods to examine practical geographic questions and communicate their findings. This is an "Accommodated" class.

## **ENGLISH**

### ***ENG1D1: English, Academic***

This course is designed to develop the oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the use of strategies that contribute to effective communication. The course is intended to prepare students for the Grade 10 academic English course, which leads to university or college preparation courses in Grades 11 and 12.

### ***ENG1LL: English, Locally Developed***

---

This course emphasizes the key reading, writing, oral communication and thinking skills students need for success in secondary school and in their daily lives. The program builds toward the Grade 10 essential English course and works toward preparing students to enter the Grade 11 course in English at the Workplace level, as well as to complete the literacy test successfully. Students read a variety of narrative and expository forms, poetry, and drama and practice the skills necessary for clear and accurate spoken and written language. Course activities will help develop confidence and self-esteem and provide motivation to succeed in school and life.

## ***ENGLISH as a SECOND LANGUAGE***

### ***ESL: English as a Second Language Courses***

---

These courses are designed for English language learners who have had opportunities to develop language and literacy skills in their own language appropriate to their age or grade level. They can read and write in their own language within the expected range for students of their age in their own country. They can build on their existing first-language skills when learning English in an ESL program. The five ESL courses are based on levels of proficiency in English. Depending on learners' previous experience with English, students may be placed in ESL Level 1, 2, 3, 4, or 5.

## ***FIRST NATIONS, MÉTIS and INUIT STUDIES***

### ***NAC10: Expressions of First Nations, Métis and Inuit Cultures***

---

"Expressions of First Nations, Métis, and Inuit Cultures" focuses on both art appreciation and art creation. It allows students to analyse First Nations, Métis, and Inuit works in the various arts and, acting ethically and responsibly, to create art works and/or productions that integrate aspects of these disciplines. This course encourages creative expression and fosters the development of skills and knowledge that prepare students for lifelong learning and participation in the arts and arts-related activities. Students will explore creative challenges through the use of elements, principles, materials, techniques, and tools associated with two or more arts disciplines, including dance, drama, media arts, music, and visual arts. Students also explore the functions of, influences on, and impact of art works from various disciplines and from several different First Nations, Métis, and Inuit cultures.

## ***HEALTH AND PHYSICAL EDUCATION***

### ***PPL101: Healthy Active Living Education(co-ed), Open***

---

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

## LANGUAGES

### ***FSF1D1: Core French, Academic***

This course provides opportunities for students to communicate and interact in French with increasing independence, with a focus on familiar topics related to their daily lives. Students will develop their skills in listening, speaking, reading, and writing by using language learning strategies introduced in the elementary Core French program, and will apply creative and critical thinking skills in various ways. They will also enhance their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning. **Prerequisite: Minimum of 600 hours of French instruction, or equivalent**

### ***FSF1O1: Core French, Grade 9, Open***

***\*This course is offered every other year\****

***Next offered in 2023-2024***

This is an introductory course for students who have little or no knowledge of French or who have not accumulated the minimum of 600 hours of elementary Core French instruction. Students will begin to understand and speak French in guided and structured interactive settings, and will develop fundamental skills in listening, speaking, reading, and writing through discussing issues and situations that are relevant to their daily lives. Throughout the course, students will develop their awareness of diverse French-speaking communities in Canada and acquire an understanding and appreciation of these communities. They will also develop a variety of skills necessary for lifelong language learning.

**Prerequisite: None**

## MATHEMATICS

### ***MTH1W1: Mathematics, De-streamed***

This course enables students to consolidate, and continue to develop, an understanding of mathematical concepts related to number sense and operations, algebra, measurement, geometry, data, probability, and financial literacy. Students will use mathematical processes, mathematical modelling, and coding to make sense of the mathematics they are learning and to apply their understanding to culturally responsive and relevant real-world situations. Students will continue to enhance their mathematical reasoning skills, including proportional reasoning, spatial reasoning, and algebraic reasoning, as they solve problems and communicate their thinking.

### ***MAT1LL: Mathematics, Locally Developed***

This course provides students who have experienced significant difficulties in previous Mathematics courses an opportunity to obtain sufficient background and skill development to prepare them for Grade 11 and 12 workplace preparation courses. Whenever possible, ideas will be presented in a real-life context, providing students with the opportunity to explore, organize, interpret, and use mathematical models to solve problems. Technology and manipulative materials will be used wherever appropriate. Assessment and evaluation will be done using a wide variety of strategies.

## SCIENCE

### ***SNC1W1: Science, De-Streamed***

This course enables students to develop their understanding of concepts related to biology, chemistry, physics, and earth and space science, and to relate science to technology, society, and the environment. Throughout the course, students will develop and refine their STEM skills as they use scientific research, scientific experimentation, and engineering design processes to investigate concepts and apply their knowledge in situations that are relevant to their lives and communities. Students will continue to develop transferable skills as they become scientifically literate global citizens.

### ***SNC1LL: Science, Locally Developed***

This course emphasizes reinforcing and strengthening science-related knowledge and skills, including scientific inquiry, critical thinking, and the relationship between science, society, and the environment, to prepare students for success in everyday life, in the workplace, and in the Science Grade 11 Workplace Preparation course. Students explore a range of topics including science in daily life, properties of common materials, life-sustaining processes in simple and complex organisms, and electrical circuits. Students have the opportunity to extend mathematical and scientific process skills and to continue developing their skills in reading, writing, and oral language through relevant and practical science activities.

## ***SOCIAL SCIENCE AND HUMANITY***

### ***HIF101: Exploring Family Studies, Open***

This course explores, within the context of families, some of the fundamental challenges people face: how to meet basic needs, how to relate to others, how to manage resources, and how to become responsible members of society. Students will explore adolescent development and will have opportunities to develop interpersonal, decision-making, and practical skills related to daily life. They will learn about the diverse ways in which families function in Canada and will use research skills as they explore topics related to individual and family needs and resources.

## ***TECHNOLOGICAL EDUCATION***

### ***TGJ101: Exploring Communications Technology, Open***

This exploratory course introduces students to concepts and skills in communications technology, which encompasses television/video and movie production, radio and audio production, print and graphic communications, photography and animation. Students will develop an awareness of related environmental and societal issues and will begin to explore secondary and post-secondary pathways leading to careers in the field.

### ***TCJ101: Exploring Construction Technology, Open***

This exploratory course introduces students to concepts and skills in construction technology which encompasses plumbing, electrical wiring, masonry, heating/cooling, carpentry, and woodworking. Students will develop an awareness of related environmental and societal issues and will begin to explore secondary and post-secondary pathways leading to careers in the field.

### ***TXJ101: Exploring Hairstyling and Aesthetics, Open***

This exploratory course introduces students to concepts and skills related to hairstyling and aesthetics, including hair, nail, and skin care applications. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and post-secondary pathways leading to careers in the field.

### ***TFJ101: Hospitality/Tourism, Open***

This exploratory course introduces students to concepts and skills related to hospitality and tourism, focusing on the areas of food handling, food preparation, the origins of foods, event planning, and local tourism. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and post-secondary pathways leading to careers in the field.

### ***TIJ101: Exploring Technologies, Open: Automotive and Manufacturing***

---

This course is completed in 2 different technology shops. Manufacturing and Transportation. Students will spend half of the semester learning about automotive technology and half of the semester learning about manufacturing technology.

This course enables students to further explore and develop technological knowledge and skills introduced in the elementary science and technology program. Students will be given the opportunity to design and create products and/or provide services related to the various technological areas or industries, working with a variety of tools, equipment, and software commonly used in industry. Students will develop an awareness of environmental and societal issues, and will begin to explore secondary and postsecondary education and training pathways leading to careers in technology-related fields.

Transportation: This exploratory course introduces students to concepts and skills related to transportation technology, which encompasses the maintenance, servicing, and repair of various types of vehicles, aircraft, and/or watercraft. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and postsecondary pathways leading to careers in the field.

Manufacturing: This exploratory course introduces students to concepts and skills related to manufacturing technology, which encompasses technical drawing, properties and preparation of materials, manufacturing techniques, and control systems. Students will develop an awareness of related environmental and societal issues, and will begin to explore secondary and postsecondary pathways leading to careers in the field.

# GRADE 10 COURSES

## The Grade 10 Program (8 credits)

All Students must take the following **5 courses**:

**English** (Locally Developed, Applied or Academic)

**Mathematics** (Locally Developed, Applied or Academic)

**Science** (Locally Developed, Applied or Academic)

**History** (Locally Developed, Applied or Academic)

**Civics & Career Studies** (Open)

**plus 3 elective courses of their choice** from the various grade 10 courses offered by Departments or, where appropriate, grade 11 courses.

**\*Important Notes** – Students who did not earn a compulsory grade 9 credit in a core subject must repeat the subject before taking the grade 10 course. Students should choose courses based on prerequisites needed for grade 11 & 12 courses that lead to their desired post-secondary destination (University, College, or the Workplace).

## ARTS

### ***ATC201: Dance, Open***

This course emphasizes the development of students' technique and creative skills relating to the elements of dance and the tools of composition in a variety of performance situations. Students will identify responsible personal and interpersonal practices related to dance processes and production, and will apply technologies and techniques throughout the process of creation to develop artistic scope in the dance arts.

### ***ADA201: Dramatic Arts, Open***

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

### ***AMI201: Instrumental Music, Open***

This course emphasizes instrumental performance of music at an intermediate level that strikes a balance between challenge and skill. Students will continue the study of music begun previously. Student learning will include participating in creative activities and listening perceptively. Students will also be required to develop a thorough understanding of the language of music, including the elements, terminology, technology and history. All students are encouraged to participate in a performing group.

**Note: Grade 9 Instrumental Music recommended**

### ***AMG201: Guitar, Open***

This course is an introduction to the guitar and emphasizes performance of music that strikes a balance between challenge and skill. Student learning will include a variety of guitar techniques, creative activities and perceptive listening. Students will also be required to develop a thorough understanding of the language of music, including the elements, terminology, and history.

### ***AVI201: Visual Arts, Open***

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

### ***AWT201: Urban Arts and Social Change, Open***

Students explore urban, street design, and art forms together with social justice issues. The course emphasizes: the elements and principles of design; observational drawing using a variety of media and techniques; as well as critical and creative thinking skills. The course utilizes a 'hands-on' approach to explore the creative process in both 2 and 3 dimensional projects. Students use art as a vehicle through which they will examine their own world and express themselves.

## ***BUSINESS STUDIES***

### ***BTT201: Information and Communication Technology in Business, Grade 10, Open***

***\*This course is offered every other year\****

***Next offered in 2022-2023***

Want to develop your computer skills using a variety of software programs? This is the course for you as you prepare to be an effective and valuable employee using technology in the workplace.

This course introduces students to information and communication technology in a business environment as they build a foundation of digital literacy skills that are necessary for success in today's society. Students will become more proficient using word processing, spreadsheet, desktop publishing and presentation design software. Throughout the course, there is an emphasis on digital literacy, electronic research, as well as examining current issues related to the impact of information technology. **Prerequisite: None**

### ***BBI201: Introduction to Business, Grade 10, Open***

***\*This course is offered every other year\****

***Next offered in 2023-2024***

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

**Prerequisite: None**

## ***CANADIAN AND WORLD STUDIES***

### ***CHC2D1: Canadian History since World War I, Academic***

This course explores the local, national, and global forces that have shaped Canada's national identity from World War I to the present. Students will investigate the challenges presented by economic, social, and technological changes and explore the contributions of individuals and groups to Canadian culture and society during this period. Students will use critical-thinking and communication skills to evaluate various interpretations of the issues and events of the period and to present their own points of view.

### ***CHC2P1: Canadian History Since World War I, Applied***

This course explores some of the pivotal events and experiences that have influenced the development of Canada's identity as a nation from World War I to the present. By examining how the country has responded to economic, social, and technological changes and how individuals and groups have contributed to Canadian culture and society during this period, Students will develop their ability to make connections between historical and current events. Students will have opportunities to formulate questions, locate information, develop informed opinions, and present ideas about the central issues and events of the period.

### ***CHC2LL: Canadian History Since World War I, Locally Developed***

This course focuses on the connections between the student and key people, events, and themes in Canadian history from World War I to the present. Students prepare for the Grades 11 and 12 Workplace Preparation history courses through the development and extension of historical literacy and inquiry skills. Students explore a variety of topics highlighting individuals and events that have contributed to the story of Canada. The major themes of Canadian identity, internal and external relationships, and changes since 1914, are explored through guided investigation. Students have the opportunity to extend analytical skills with a focus on identifying and interpreting events and perspectives and making connections. Students practice reading, writing, visual, and oral literacy skills, and mathematical literacy skills to identify and communicate ideas in a variety of forms.

### ***CHV2OH: Civics, Open (half credit)***

This course explores what it means to be an informed, participating citizen in a democratic society. Students will learn about the elements of democracy in local, national, and global contexts, about political reactions to social change, and about political decision-making processes in Canada. They will explore their own and others' ideas about civics questions and learn how to think critically about public issues and react responsibly to them.

**Note: Grade 10 students do not select this course individually. Please select CIVCA1 (Guidance and Career Education).**

## ***ENGLISH***

### ***ENG2D1: English, Academic***

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course. **Prerequisite: English, Grade 9, Academic or Applied**

### ***ENG2P1: English, Applied***

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in secondary school and daily life. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course. **Prerequisite: English, Grade 9, Academic or Applied**

### ***ENG2LL: English, Locally Developed***

This course emphasizes the key reading, writing, oral communication and thinking skills students need for success in secondary school and in their daily lives. The program builds on the Grade 9 essential English course and works toward preparing students to enter the Grade 11 course in English at the workplace and to attempt the literacy test with success. Students explore a variety of narrative and expository forms, poetry, and drama and refine the skills necessary for clear and accurate spoken and written language. Course activities further the development of confidence and self-esteem and provide motivation to succeed in school and life. **Prerequisite: Grade 9, Locally Developed English**

## **ENGLISH as a SECOND LANGUAGE**

### ***ESL: English as a Second Language Courses***

These courses are designed for English language learners who have had opportunities to develop language and literacy skills in their own language appropriate to their age or grade level. They can read and write in their own language within the expected range for students of their age in their own country. They can build on their existing first-language skills when learning English in an ESL program. The five ESL courses are based on levels of proficiency in English. Depending on learners' previous experience with English, students may be placed in ESL Level 1, 2, 3, 4, or 5.

## **GUIDANCE AND CAREER EDUCATION**

### ***GLC2OH: Career Studies, Open (half credit)***

This course teaches students how to develop and achieve personal goals for future learning, work and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores post-secondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan. **Note: Grade 10 students do not select this course individually. Please select CIVCA1 (Guidance and Career Education).**

## **HEALTH AND PHYSICAL EDUCATION**

### ***PPL2O1: Healthy Active Living Education, Open (co-ed)***

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

### ***PAF2OM: Personal and Fitness Activities, Open (Males)***

### ***PAF2OF: Personal and Fitness Activities, Open (Female)***

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively. This course will focus on activities to promote lifelong physical and mental wellness in a fitness center atmosphere. Students will learn to develop and revise personal fitness plans to suit their own needs, as well as assess and monitor their health related fitness during physical activity. The development of these skills will start students on a path to achieving their personal wellness goals both now and in the future.

## LANGUAGES

### ***FSF2D1: Core French, Academic***

This course provides opportunities for students to communicate in French about personally relevant, familiar, and academic topics in real-life situations with increasing independence. Students will exchange information, ideas, and opinions with others in guided and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through the selective use of strategies that contribute to effective communication. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning. **Prerequisite: Core French, Grade 9, Academic or Applied**

### ***FSF2P1: Core French, Applied***

This course provides opportunities for students to communicate in French about everyday matters and topics of personal interest in real-life situations. Students will exchange information, ideas, and opinions with others in structured, guided, and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through using language learning strategies for understanding texts and communicating clearly. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning. **Prerequisite: Core French, Grade 9, Academic or Applied**

## MATHEMATICS

### ***MPM2D1: Principles of Mathematics, Academic***

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Grade 9 Mathematics, Academic**

### ***MFM2P1: Foundations of Mathematics, Applied***

This course enables students to consolidate their understanding of linear relations and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relations. Students will investigate similar triangles, the trigonometry of right triangles, and the measurement of three-dimensional figures. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. **Prerequisite: Grade 9 Mathematics, Academic or Applied**

### ***MAT2LL: Mathematics, Locally Developed***

This course enables students to deepen their knowledge and understanding of the basic concepts in patterns and relationships, measurement and geometry and proportionality through hands-on activities. Students will extend their problem-solving experiences in a variety of applications. The effective use of technology in learning and in problem solving will be emphasized as well as links to careers and preparation for the world of work. **Prerequisite: Grade 9 Math, Locally Developed**

## SCIENCE

### ***SNC2D1: Science, Academic***

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

**Prerequisite:** Science, Grade 9, Academic or Applied

### ***SNC2P1: Science, Applied***

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real-world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter.

**Prerequisite:** Science, Grade 9, Academic or Applied

### ***SNC2LL: Science, Locally Developed***

This course emphasizes reinforcing and strengthening science-related knowledge and skills, including scientific inquiry, critical thinking, and the relationship between science, society, and the environment, to prepare students for success in everyday life, in the workplace, and in the Science Grade 11 Workplace Preparation course. Students explore a range of topics including science in daily life, properties of common materials, life-sustaining processes in simple and complex organisms, and electrical circuits. Students have the opportunity to extend mathematical and scientific process skills and to continue developing their skills in reading, writing, and oral language through relevant and practical science activities.

**Prerequisite:** Grade 9, Locally Developed Science OR SNC1P or SNC1D **Note:** This course is counted as an optional, not a compulsory credit.

## SOCIAL SCIENCE AND HUMANITIES

### ***HNL2O1: Clothing, Open***

This course introduces students to the world of clothing. Students will gain knowledge about clothing and demonstrate basic skills associated with various techniques and technologies used to create garments and accessories. Students will learn about the functions of clothing and accessories and what clothing communicates about the wearer. They will learn how to enhance their personal wardrobe by assessing garment quality, developing shopping strategies, and developing an understanding of the advantages and disadvantages of various retail formats. Students will develop research skills as they investigate topics related to clothing.

**Prerequisite:** None

### ***HFN2O1: Food and Nutrition, Open***

This course explores the factors that affect attitudes and decisions about food, examines current issues of body image and food marketing, and is grounded in the scientific study of nutrition. Students will learn how to make informed food choices and how to prepare foods, and will investigate our Canadian food heritage and food industries, as well as global food issues. The course also introduces students to research skills related to food and nutrition.

# **TECHNOLOGICAL EDUCATION**

---

## ***TGJ201: Communications Technology, Open***

This course introduces students to communications technology from a media perspective. Students will work in the areas of TV/video and movie production, radio and audio production, print and graphic communications, photography, and interactive new media and animation. Student projects may include computer-based activities such as creating videos, editing photos, working with audio, cartooning, developing animations, and designing web pages. Students will also develop an awareness of environmental and societal issues related to communications technology, and will explore secondary and post-secondary education and training pathways and career opportunities in the various communications technology fields.

---

## ***TCJ201: Construction Technology, Open***

This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will learn to create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and post-secondary pathways leading to careers in the industry.

---

## ***TXJ201: Hairstyling and Aesthetics, Open***

This course presents hairstyling, make-up, and nail care techniques from a salon/spa perspective. Using materials, processes, and techniques used in the industry, students learn fundamental skills in hairstyling, giving manicures and facials, and providing hair/scalp analyses and treatments. Students will also consider related environmental and societal issues, and will explore secondary and post-secondary pathways leading to careers in the field of hairstyling and aesthetics.

---

## ***TFJ201: Hospitality and Tourism, Open***

This course provides students with opportunities to explore different areas of hospitality and tourism, as reflected in the various sectors of the tourism industry, with an emphasis on food service. Students will study culinary techniques of food handling and preparation, health and safety standards, the use of tools and equipment, the origins of foods, and event planning, and will learn about tourism attractions across Ontario. Students will develop an awareness of related environmental and societal issues, and will explore secondary and post-secondary pathways leading to careers in the tourism industry.

---

## ***TDJ201: Technological Design, Open***

This course provides students with opportunities to apply a design process to meet a variety of technological challenges. Students will research projects, create designs, build models and/or prototypes, and assess products and/or processes using appropriate tools, techniques, and strategies. Student projects may include designs for homes, vehicles, bridges, robotic arms, clothing, or other products. Students will develop an awareness of environmental and societal issues related to technological design, and will learn about secondary and postsecondary education and training leading to careers in the field.

Prerequisite: None

---

## ***TTJ201: Transportation Technology, Open***

This course introduces students to the service and maintenance of vehicles, aircraft, and/or watercraft. Students will develop knowledge and skills related to the construction and operation of vehicle/craft systems and learn maintenance and repair techniques. Student projects may include the construction of a self-propelled vehicle or craft, engine service, tire/wheel service, electrical/battery service, and proper body care. Students will develop an awareness of related environmental and societal issues, and will explore secondary and post-secondary pathways leading to careers in the transportation industry.

***TMJ2O1: Manufacturing Technology, Open***

---

This course introduces students to the manufacturing industry by giving them an opportunity to design and fabricate products using a variety of processes, tools, and equipment. Students will learn about technical drawing, properties and preparation of materials, and manufacturing techniques. Student projects may include a robotic challenge, a design challenge, or a fabrication project involving processes such as machining, welding, vacuum forming, or injection molding. Students will develop an awareness of environmental and societal issues related to manufacturing, and will learn about secondary and postsecondary pathways leading to careers in the industry. **Prerequisite: None**

# GRADE 11 COURSES

## The Grade 11 Program (8 credits)

All students must take the following **2 courses**:

**English** (Workplace, College or University)

**Mathematics** (Workplace, College or University)

**plus**

**6 elective courses of their choice** from the various grade 11 courses offered by departments or, where appropriate, grade 10 or grade 12 courses.

**\*Important Notes:** Students who did not earn a compulsory grade 10 credit in a core subject must repeat the course. Students should be aware of the 18 compulsory credits required for their Diploma and ensure that they have earned a **Group 1, Group 2 or Group 3** credit by the end of grade 11.

## ARTS

### ***ATC3M1: Dance, University-College***

This course emphasizes the development of students' artistry, improvisational and compositional skills, and technical proficiency in global dance genres. Students will apply dance elements, techniques, and tools in a variety of ways, including performance situations; describe and model responsible practices related to the dance environment; and reflect on how the study of dance affects personal and artistic development.

**Prerequisite:** Dance, Grade 9 or 10, Open

### ***ADA3M1: Dramatic Arts, University/College***

This course requires students to create and perform in dramatic presentations. Students will analyse, interpret, and perform dramatic works from various cultures and time periods. Students will research various acting styles and conventions that could be used in their presentations, and analyse the functions of playwrights, directors, actors, designers, technicians, and audiences. **Prerequisite:** Drama, Grade 9 or 10, Open

### ***ADD3M1: Theatre Production, University/College***

This course requires students to engage in the creation, rehearsal, and performance of a major theatrical production (musical or non-musical) for a public audience. All students must complete written and practical theory work based on the acquisition and development of techniques needed for their primary role in the play, and additionally, the exploration of a secondary role from the following areas: set design and scenic painting, stage management, props, costume creation, publicity, lighting and sound production. Students will develop a variety of skills related to their various cast and crew positions, with a focus on collaboration, organization, and protocol required in a theatre company and the ability to critically analyse the processes involved in creating a major theatrical production. A substantial out-of-class time commitment is a major requirement for success. Dedication and professionalism must be demonstrated by attending all out of class rehearsals and performances; appropriate adjustments must be made to other commitments, such as work and team/club schedules. **Prerequisite:** Drama, Grade 9 or 10, Open

### **AMI3M1: Instrumental Music, University /College**

This course emphasizes the appreciation, analysis, and performance of various kinds of music, including popular music, and Canadian, non-western music and baroque and classical music. Students will perform technical exercises and appropriate repertoire, complete detailed creative activities, and analyze and evaluate live and recorded performances. Students will continue to increase their understanding of the elements of music while developing their instrumental technique and their imaginative abilities. All students are encouraged to participate in a performing group. **Prerequisite: Grade 9 or Grade 10 Instrumental Music, Open**

### **AMG3O1: Instrumental Music, Guitar, Open**

This course emphasizes the appreciation, analysis, and performance of various kinds of music, including baroque and classical, popular, Canadian and non-Western music. Students will perform technical exercises and appropriate repertoire, complete detailed creative activities and analyze and evaluate live and recorded performances. They will continue to increase their understanding of the elements of music while developing their technical and imaginative abilities. These courses will focus specifically on performance, theory, history, composition and arrangement using the guitar as our primary instrument.

### **AMG3M1: Instrumental Music, Guitar, University/College**

This course emphasizes the appreciation, analysis, and performance of various kinds of music, including baroque and classical, popular, Canadian and non-Western music. Students will perform technical exercises and appropriate repertoire, complete detailed creative activities and analyze and evaluate live and recorded performances. They will continue to increase their understanding of the elements of music while developing their technical and imaginative abilities. These courses will focus specifically on performance, theory, history, composition and arrangement using the guitar as our primary instrument. **Prerequisite Guitar, Grade 10**

### **AVI3O1: Visual Arts – Comprehensive, Open**

This course focuses on studio activities in one or more of the visual arts, including drawing, painting, sculpture, photography, printmaking, collage, and/or multimedia art. Students will use the creative process to create artworks that reflect a wide range of subjects and will evaluate works using the critical analysis process. Students will also explore works of art within a personal, contemporary, historical, and cultural context.

**Prerequisite: Visual Arts, Grade 9 or 10, Open**

### **AVI3M1: Visual Arts, University/College**

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

**Prerequisite: Visual Arts, Grade 9 or 10, Open**

### **AWC3M1: Ceramics/Glass FusionCourse**

This course enables students to further develop their knowledge and skills in visual arts with a specific focus on pottery and glass studies. They will use the creative process to explore a wide range of themes and techniques through studio work in pottery and glass. Students will focus on pottery wheel work, glaze dipping/mixing, mold building and a variety of contemporary and experimental glass fusion techniques. Students will continue to develop their critical skills as well as an appreciation of more contemporary work.

**Prerequisite: Visual Arts, Grade 9 or 10, Open**

### **AWQ301: Photography, Open**

The focus of this course is the introduction to the field of photography and will allow students to improve technical skills while pursuing their own creative interests. Students will also explore photography within a personal, contemporary, historical, and cultural context. This course is designed to give students a sound working knowledge of the art and science of digital photography. Students will become familiar with post-process editing, the elements and principles of design and the materials, processes, techniques and styles of photography. The majority of the assignments require the use of a digital camera (student supplied SD Card). **Prerequisite: None**

## ***BUSINESS STUDIES***

### ***BDI3C1: Entrepreneurship: The Venture, Grade 11 College Preparation***

Interested in running a business one day? Then this course is for you as you will learn the steps involved in preparing a venture plan and have the opportunity to create one of your own. This course focuses on ways in which entrepreneurs recognize opportunities, generate ideas, and organize resources to plan successful ventures that enable them to achieve their goals. Students will create a venture plan for a school-based or student-run business. Through hands-on experiences, students will have opportunities to develop the values, traits, and skills most often associated with successful entrepreneurs.

### ***BAF3M1: Financial Accounting Fundamentals, Grade 11 University/College Preparation***

Want to know more about money, specifically related to how businesses earn and account for their profits? This course is for you where you can learn how to read financial statements, analyze the progress of companies, and develop skills that will also be useful in managing your own finances.

Students will be introduced to the fundamental principles and procedures of accounting as they develop their financial analysis and decision making skills in both a manual and computerized setting. Students will acquire an understanding of the accounting cycle for a sole proprietorship (one owner) for both service and merchandising businesses, starting with recording of transactions and going through the process to preparing financial statements. Ethics, current issues and career opportunities will also be studied.

## ***CANADIAN AND WORLD STUDIES***

### ***CGG3O1: Travel and Tourism: A Geographic Perspective, Grade 11, Open***

This course focuses on travel and tourism as the vehicle for studying selected world regions. Using a variety of geotechnologies and inquiry and communication methods, students will conduct and present case studies that develop their understanding of the unique characteristics of selected world regions; the environmental, cultural, economic, and political factors that influence travel and tourism; and the impact of the travel industry on communities and environments around the world. **Prerequisite: Canadian Geographic Issues, Grade 9, Academic or Applied**

### ***CHA3U1: American History, Grade 11, University Preparation***

This course traces the social, economic, and political development of the United States from colonial times to the present. Students will examine issues of diversity, identity, and culture that have influenced the country's social and political formation and will consider the implications of its expansion into a global superpower. Students will use critical-thinking and communication skills to determine causal relationships, evaluate multiple perspectives, and present their own points of view. **Prerequisite: Canadian History Since World War I, Grade 10, Academic or Applied**

### ***CHW3M1: World History to End of the Fifteenth Century, University/College***

This course investigates the history of various societies around the world, from earliest times to around 1500 CE. Students will examine life in and the legacy of various ancient and pre-modern societies throughout the world, including those in Africa, Asia, Europe, and the Americas. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras. **Prerequisite: Canadian History since World War I, Grade 10, Academic or Applied**

### ***CLU3M1: Understanding Canadian Law, University/College***

This course explores Canadian law with a focus on legal issues that are relevant to people's everyday lives. Students will investigate fundamental legal concepts and processes to gain a practical understanding of Canada's legal system, including the criminal justice system. Students will use critical-thinking, inquiry, and communication skills to develop informed opinions on legal issues and apply this knowledge in a variety of ways and settings, including case analysis, legal research projects, mock trials, and debates. **Prerequisite: Canadian History Since World War I, Grade 10, Academic or Applied**

### ***CPC3O1: Politics in Action, Open***

This course enables students to develop plans for change in the local, national, and/or global community. Students will explore various issues, investigating their causes as well as their impact, and determining where change is needed, and why. They will examine the effectiveness of various problem-solving strategies used by individuals and groups that have brought about and/or are attempting to bring about political change in democratic societies. In addition, students will analyse the role and perspectives of governments and other stakeholders in relation to issues of political importance and will consider factors affecting their own and others' political engagement. Students will apply the concepts of political thinking and the political inquiry process as they investigate various issues of political importance and develop a plan of action to address a selected issue. **Prerequisite: Civics and Citizenship, Grade 10, Open**

## ***COOPERATIVE EDUCATION***

### **What is Co-op?**

Co-operative Education is a valuable learning experience that takes place in the community. Students have the opportunity to "test drive a career" prior to postsecondary school to help them develop a career path. Their co-op experiences help the students to develop essential skills and work habits necessary for success within the context of school and the world of work. Students could be working in almost any type of business or community organization (e.g. vet clinic, elementary school, daycare, retail, restaurant, auto body, auto mechanics, welding, etc.).

A student's experiential learning program is credit bearing and may be timetabled for either half of the school day (2 credits), or the entire day (4 credits). Credits are granted based on in class assignments, employer evaluations, and successful attendance at the work placement. As a result, strong attendance is mandatory. Register for one of the co-op courses listed below. Students are advised to speak with a guidance counsellor or one of the co-op teachers to discuss the suitability of this program.

***(continue...)***

This course consists of a community-connected experience and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning at school and beyond, today and in the future, as well as in their education and career/life planning. Within the context of the community-connected experience, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.

**Prerequisite:** None

### Why Take Co-op?

Cooperative education provides students with an opportunity to enhance their academic life at Nottawasaga Pines Secondary School and supports student decisions pertaining to choices in post-secondary workplace or education programs (e.g. apprenticeship, college, university). Students will pursue their interests in an appropriate workplace and develop knowledge, skills and attitudes that are essential in today's working world. In addition, the Ontario Youth Apprenticeship Program (OYAP) provides an opportunity for students interested in pursuing a career in apprenticeable trades to begin their pathway prior to completing secondary school.

Students are required to arrange their own transportation to their work site. Some cooperative education placements may involve costs for medical/immunizations, security checks, safety equipment or special clothing. These costs are the responsibility of the student and the parent/guardian. It should also be understood that placements in some fields of work are very limited and that the first placement choice cannot be guaranteed. Students who are interested in Co-op must complete the following steps prior to beginning the program.

#### ***GWL302 – 2 Credit Cooperative Education Program:***

---

The student is at the workplace for a total of 2.5 hours for either the morning or afternoon portion of each school day. The student is enrolled in classes at the school for the other part of the school day.

#### ***GLN404 – 4 Credit Cooperative Education Program:***

---

The student is at the workplace for a full school day(5 hours).

## **ENGLISH**

#### ***NBE3C1: English: Understanding First Nations, Métis, and Inuit Voices, Grade 11, College***

---

This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also looks at the perspectives and influences of texts that relate to those cultures. In order to understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will study the use of text forms by Indigenous authors/creators from other periods in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.

**Prerequisite:** English, Grade 10, Academic or Applied

---

***NBE3U1: English: Understanding First Nations, Métis, and Inuit Voices, Grade 11, University***

---

This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/ creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

**Prerequisite:** English, Grade 10, Academic

---

***NBE3E1: English: Understanding First Nations, Métis, and Inuit Voices, Grade 11, Workplace***

---

This course explores themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media texts emerging from First Nations, Métis, and Inuit cultures in Canada, as well as some texts that relate to those cultures. In order to better understand contemporary texts, students will explore connections between traditional and contemporary text forms and cultural and community aspects of identity, relationships, and self-determination, sovereignty, or self-governance. Students will also create oral, written, and media texts focusing on the development of literacy, communication, and critical thinking skills necessary for success in the workplace and daily life. The course is intended to prepare students for the compulsory Grade 12 English workplace preparation course.

**Prerequisite:** English, Grade 10, Academic or Applied, or the Grade 10 locally developed compulsory credit (LDCC) course in English

## ***ENGLISH as a SECOND LANGUAGE***

---

***ESL: English as a Second Language Courses***

---

These courses are designed for English language learners who have had opportunities to develop language and literacy skills in their own language appropriate to their age or grade level. They can read and write in their own language within the expected range for students of their age in their own country. They can build on their existing first-language skills when learning English in an ESL program. The five ESL courses are based on levels of proficiency in English. Depending on learners' previous experience with English, students may be placed in ESL Level 1, 2, 3, 4, or 5.

## ***GUIDANCE AND CAREER EDUCATION***

---

***GPP3O1: Leadership and Peer Support, Open***

---

This course prepares students to act in leadership and peer support roles. They will design and implement a plan for contributing to their school and/or community; develop skills in communication, interpersonal relations, teamwork, and conflict management; and apply those skills in leadership and/or peer support roles – for example, as a student council member or a peer tutor. Students will examine group dynamics and learn the value of diversity within groups and communities.

**Prerequisite:** None

## HEALTH AND PHYSICAL EDUCATION

### ***PAF3O1: Personal and Fitness Activities(co-ed), Open***

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively. This course will focus on activities to promote lifelong physical and mental wellness in a fitness center atmosphere. Students will learn to develop and revise personal fitness plans to suit their own needs, as well as assess and monitor their health related fitness during physical activity. The development of these skills will start students on a path to achieving their personal wellness goals both now and in the future.

### ***PPL3O1: Healthy Active Living Education(co-ed), Open***

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

## INTERDISCIPLINARY STUDIES

### ***IDC3O - Yearbook (BLOCKY)***

This course is designed for those students interested in learning the skills of journalism, communications, and publishing as they pertain to the preparation of the annual school yearbook. Such areas as the elements of a good page design, and photography skills will be studied. Students will explore the importance of using responsible practices when engaged in the creative process. Students will develop the skills necessary to create and interpret media art works. **Prerequisite: None**

## LANGUAGES

### ***FSF3U1: Core French, University***

This course offers students extended opportunities to speak and interact in real-life situations in French with greater independence. Students will develop their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, through responding to and exploring a variety of oral and written texts. They will also broaden their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning. **Prerequisite: Core French, Grade 10, Academic**

# MATHEMATICS

## ***MBF3C1: Foundations for College Mathematics, College***

This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; develop their ability to reason by collecting, analyzing, and evaluating data involving one variable; connect probability and statistics; and solve problems in geometry and trigonometry. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

**Prerequisite: Foundations of Mathematics, Grade 10, Applied**

## ***MCR3U1: Functions, University***

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Principles of Mathematics, Grade 10, Academic**

## ***MCF3M1: Functions and Applications, University/College***

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modeling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Principles of Mathematics, Grade 10, Academic, or Foundations of Mathematics, Grade 10, Applied**

## ***MEL3E1: Mathematics for Work and Everyday Life, Workplace***

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will solve problems associated with earning money, paying taxes, and making purchases; apply calculations of simple and compound interest in saving, investing, and borrowing; and calculate the costs of transportation and travel in a variety of situations. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. **Prerequisite: Principles of Mathematics, Grade 9, Academic, or Foundations of Mathematics, Grade 9, Applied, or a Ministry-approved Locally Developed Grade 10 Mathematics course**

# SCIENCE

## ***SBI3U1: Biology, University***

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

**Prerequisite: Science, Grade 10, Academic**

### ***SBI3C1: Biology, College***

This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields. **Prerequisite: Science, Grade 10, Academic or Applied**

### ***SCH3U1: Chemistry, University***

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment. **Prerequisite: Science, Grade 10, Academic**

### ***SVN3E1: Environmental Science, Grade 11, Workplace***

This course provides students with the fundamental knowledge of and skills relating to environmental science that will help them succeed in work and life after secondary school. Students will explore a range of topics, including the impact of human activities on the environment; human health and the environment; energy conservation; resource science and management; and safety and environmental responsibility in the workplace. Emphasis is placed on relevant, practical applications and current topics in environmental science, with attention to the refinement of students' literacy and mathematical literacy skills as well as the development of their scientific and environmental literacy. **Prerequisite: Science, Grade 9, Academic or Applied, or a Grade 9 or 10 Locally Developed compulsory credit (LDCC) course in Science**

### ***SVN3M1: Environmental Science, University/College***

This course provides students with the fundamental knowledge of and skills relating to environmental science that will help them succeed in life after secondary school. Students will explore a range of topics, including the role of science in addressing contemporary environmental challenges; the impact of the environment on human health; sustainable agriculture and forestry; the reduction and management of waste; and the conservation of energy. Students will increase their scientific and environmental literacy and examine the interrelationships between science, the environment, and society in a variety of areas. **Prerequisite: Grade 10 Science, Applied or Academic**

### ***SPH3U1: Physics, University***

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment. **Prerequisite: Science, Grade 10, Academic**

## ***SOCIAL SCIENCES AND HUMANITIES***

### ***HHD3O1: Dynamics of Human Relationships, Open***

This course focuses on helping students understand the individual and group factors that contribute to healthy relationships. Students will examine the connections between their own self-concept and their interpersonal relationships. They will learn and practise strategies for developing and maintaining healthy relationships with friends, family, and community members, as well as with partners in intimate relationships. Students will use research and inquiry skills to investigate topics related to healthy relationships. **Prerequisite: None.**

### ***HNC3C1: Understanding Fashion, College***

This course introduces students to the world of fashion. Students will gain an understanding of theories related to fashion trends and of how culture, media, fashion cycles, retailing, and social and environmental factors influence fashion trends and consumer behaviour. Students will use various tools, technologies, and techniques safely and correctly to create fashion items. In addition, students will apply knowledge of fibers, fabrics, and the elements and principles of design when creating and assessing fashion-related products. Students will develop research skills as they investigate topics related to fashion. **Prerequisite: None**

### ***HSE3E1: Equity, Diversity and Social Justice, Workplace***

This course enables students to develop an understanding of historical and contemporary issues relating to equity, diversity, and social justice in a variety of contexts. Students will explore the nature of diversity and power relations in Canada and how social norms shape individual identity. They will learn about social activism and how to address situations that involve discrimination, harassment, and denial of rights. Students will develop and apply research skills and will design and implement a social action initiative relating to an equity, diversity, or social justice issue. **Prerequisite: None.**

### ***HPC3O1: Raising Healthy Children, Open***

This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to caregiving and child rearing. **Prerequisite: None.**

### ***HSP3U1: Introduction to Anthropology, Psychology, and Sociology, University***

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science, and to become familiar with current thinking on a range of issues within the three disciplines. **Prerequisite: None**

### ***HSP3C1: Introduction to Anthropology, Psychology, and Sociology, College***

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. They will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines. **Prerequisite: None**

## ***TECHNOLOGICAL EDUCATION***

### ***TGJ3M1: Communications Technology, Grade 11 University/College Preparation***

This course examines communications technology from a media perspective. Students will develop knowledge and skills as they design and produce media projects in the areas of live, recorded, and graphic communications. These areas may include TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also develop an awareness of related environmental and societal issues, and will explore college and university programs and career opportunities in the various communications technology fields. **Prerequisite: None**

### ***TCJ3E1: Construction Technology (Household Maintenance), Workplace***

---

This course enables students to develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling, and plumbing for residential construction. Students will gain hands-on experience using a variety of materials, processes, tools, and equipment to design, lay out, and build projects. They will create and read technical drawings, learn construction terminology, interpret building codes and regulations, and apply mathematical skills as they develop construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and will explore postsecondary and career opportunities in the field. **Prerequisite: None**

### ***TWJ3E1: Custom Woodworking, Workplace***

---

This course enables students to develop knowledge and skills related to cabinet and furniture design. Students will gain practical experience using a variety of the materials, tools, equipment, and joinery techniques associated with custom woodworking. Students will learn to create and interpret technical drawings and will plan, design, and fabricate projects. They will also develop an awareness of environmental and societal issues related to the woodworking industry, and will explore apprenticeships, post-secondary training, and career opportunities. **Prerequisite: None**

### ***TXJ3E1: Hairstyling and Aesthetics, Workplace***

---

This course enables students to develop knowledge and skills in cosmetology and offers a variety of applications that will equip students to provide services for a diverse clientele. Students will identify trends in the hairstyling and aesthetics industry, learn about related health and safety laws, and expand their communication and interpersonal skills through interactions with peers and clients. Students will also consider environmental and societal issues related to the industry, and will acquire a more detailed knowledge of apprenticeships and direct-entry work positions. **Prerequisite: None**

### ***TXH3E1: Barbering, Workplace***

---

This course enables students to develop knowledge and skills in barbering and offers a variety of applications that will equip students to provide services for a diverse clientele. Students will identify trends in the barbering industry, learn about related health and safety laws and expand their communication and interpersonal skills through interactions with peers and clients. Students also consider environmental and societal issues related to the industry, and will acquire more detailed knowledge of apprenticeships and direct-entry work positions. **Prerequisite: None**

### ***TFJ3C1: Hospitality/Tourism, College***

---

This course enables students to develop or expand knowledge and skills related to hospitality and tourism, as reflected in the various sectors of the tourism industry. Students will learn about preparing and presenting food, evaluating facilities, controlling inventory, and marketing and managing events and activities, and will investigate customer service principles and the cultural and economic forces that drive tourism trends. Students will develop an awareness of health and safety standards, environmental and societal issues, and career opportunities in the tourism industry. **Prerequisite: None**

### ***TFJ3E1: Hospitality/Tourism, Workplace***

---

This course enables students to acquire knowledge and skills related to the food and beverage services sector of the tourism industry. Students will learn how to prepare, present, and serve food using a variety of tools and equipment, and will develop an understanding of the fundamentals of providing high-quality service to ensure customer satisfaction and the components of running a successful event or activity. Students will develop an awareness of health and safety practices, environmental and societal issues, and career opportunities in the food and beverage services sector. **Prerequisite: None**

***TMJ3E1: Manufacturing Technology, College***

---

This hands-on, project-based course is designed for students planning to enter an occupation or apprenticeship in manufacturing directly after graduation. Students will work on a variety of manufacturing projects, developing knowledge and skills in design, fabrication, and problem solving and using tools and equipment such as engine lathes, milling machines, and welding machines. In addition, students may have the opportunity to acquire industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary school pathways that lead to careers in the industry. **Prerequisite: None**

***TDJ3M1: Technological Design and the Environment, University/College***

---

This course examines how technological design is influenced by human, environmental, financial, and material requirements and resources. Students will research, design, build, and assess solutions that meet specific human needs, using working drawings and other communication methods to present their design ideas. They will develop an awareness of environmental, societal, and cultural issues related to technological design, and will explore career opportunities in the field, as well as the college and/or university program requirements for them. This course will have an emphasis on robotics and engineering. **Prerequisite: None**

***TTJ3O1: Transportation Technology: Vehicle Ownership, Open***

---

This general interest course enables students to become familiar with the options and features of various vehicles, issues of registration, and the legal requirements affecting vehicle owners. Students will also learn about vehicle financing and insurance, vehicle maintenance, emergency procedures, and the responsibilities of being a vehicle owner. Students will develop an awareness of environmental and societal issues related to vehicle ownership and use, and will explore career opportunities in the transportation industry. **Prerequisite: None**

# GRADE 12 COURSES

## The Grade 12 Program (6 credits)

All students must take the following **course**:

**English** (Workplace, College or University)

**plus**

**5 elective courses of their choice** from the various grade 12 courses offered by departments or, where appropriate, grade 11 courses.

**\*Important Notes:** Students who did not earn a compulsory grade 11 credit in a core subject must repeat the course. Students should be aware of the 18 compulsory credits required for their Diploma and ensure that they have earned a **Group 1, Group 2 or Group 3** credit by the end of grade 11.

## ARTS

### ***AVI4M1: Visual Arts, Grade 12, University/College Preparation***

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts. **Prerequisite: Visual Arts, Grade 11, University/College Preparation**

### ***AVI4E1: Visual Arts, Grade 12, Workplace Preparation***

This course focuses on a practical approach to a variety of art and design projects related to the workplace. Students will use the creative process to produce a traditional and/or digital portfolio of their work in a variety of media. Students may focus on various aspects of visual arts, including advertising, ceramics, fashion design, graphic arts, jewellery design, and/or web design. **Prerequisite: Visual Arts, Grade 11, Open**

### ***ADA4M1: Drama, Grade 12, University/College Preparation***

This course requires students to experiment individually and collaboratively with forms and conventions of both drama and theatre from various cultures and time periods. Students will interpret dramatic literature and other texts and media sources while learning about various theories of directing and acting. Students will examine the significance of dramatic arts in various cultures, and will analyse how the knowledge and skills developed in drama are related to their personal skills, social awareness, and goals beyond secondary school. **Prerequisite: Drama, Grade 11, University/College Preparation**

### ***ADD4M1: Theatre Production, University/College***

This course requires students to engage in the creation, rehearsal, and performance of a major theatrical production (musical or non-musical) for a public audience. All students must complete written and practical theory work based on the acquisition and development of techniques needed for their primary role in the play, and additionally, the exploration of a secondary role from the following areas: set design and scenic painting, stage management, props, costume creation, publicity, lighting and sound production. Students will develop a variety of skills related to their various cast and crew positions, with a focus on collaboration, organization, and protocol required in a theatre company and the ability to critically analyse the processes involved in creating a major theatrical production. A substantial out-of-class time commitment is a major requirement for success. Dedication and professionalism must be demonstrated by attending all out of class rehearsals and performances; appropriate adjustments must be made to other commitments, such as work and team/club schedules. **Prerequisite: Drama, Grade 9 or 10, Open**

***ATC4M1: Dance, Grade 12, University/College Preparation***

This course emphasizes the development of students' technical proficiency, fluency in the language of movement in dance genres from around the world, and understanding of dance science. Students will explain the social, cultural, and historical contexts of dance; apply the creative process through the art of dance in a variety of ways; and exhibit an understanding of the purpose and possibilities of continuing engagement in the arts as a lifelong learner. **Prerequisite: Dance, Grade 11, University/College Preparation**

***AMI4M1: Instrumental Music, University /College***

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers. **Prerequisite: Grade 11 Instrumental Music**

***AMG4M1: Instrumental Music, Guitar, University/College***

This course emphasizes the appreciation, analysis, and performance of various kinds of music, including baroque and classical, popular, Canadian and non-Western music. Students will perform technical exercises and appropriate repertoire, complete detailed creative activities and analyze and evaluate live and recorded performances. They will continue to increase their understanding of the elements of music while developing their technical and imaginative abilities. These courses will focus specifically on performance, theory, history, composition and arrangement using the guitar as our primary instrument. **Prerequisite Guitar, Grade 11**

## ***BUSINESS STUDIES***

***BOH4M1: Business Leadership;;Management Fundamentals, Grade 12 University/College Preparation***

Want to know more about the management side of business? Then this course is for you as you will learn about the ways in which people in organizations work together to make a cohesive team and how managers play an important role in this process. It will also provide leadership opportunities to help prepare you for a career in business or postsecondary education in the business field.

## ***CANADIAN AND WORLD STUDIES***

***CHY4U1: World History Since the Fifteenth Century, Grade 12, University Preparation***

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history. **Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities.**

#### ***CGW4U1: World Issues: A Geographical Analysis, Grade 12, University Preparation***

---

This course looks at the global challenge of creating a more sustainable and equitable world. Students will explore a range of issues involving environmental, economic, social, and geopolitical interrelationships, and will examine governmental policies related to these issues. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate these complex issues, including their impact on natural and human communities around the world. **Prerequisite: Any university or university/college preparation course in Canadian and world studies, English or social sciences and humanities. Prerequisite: Canadian Geographic Issues, Grade 9, Academic or Applied.**

#### ***CGW4C1: World Issues: A Geographical Analysis, Grade 12, College Preparation***

---

This course explores the global challenge of meeting the basic needs of all people while sustaining the natural environment. Students will examine global inequities, including those related to food, water, energy, and development, and will explore global issues through environmental, social, economic, and political lenses. Students will apply the concepts of geographic thinking and the geographic inquiry process including spatial technologies, to investigate a range of current geographic issues facing Canada and the world. **Prerequisite: Canadian Geographic Issues, Grade 9, Academic or Applied.**

#### ***CLN4U1: Canadian and International Law, Grade 12, University Preparation***

---

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop an understanding of the principles of Canadian and international law and of issues related to human rights and freedoms, conflict resolution, and criminal, environmental, and workplace law, both in Canada and internationally. Students will apply the concepts of legal thinking and the legal studies inquiry process, and will develop legal reasoning skills, when investigating these and other issues in both Canadian and international contexts. **Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities.**

#### ***CIC4E1: Making Personal Economic Choices, Grade 12, Workplace***

---

This course provides students with a fundamental understanding of a variety of key economic issues and practices, helping them develop their ability to make informed economic choices in their day-to-day lives. Students will examine practical financial matters, such as personal budgeting, taxes, credit and debt, and savings and investment, as well as various economic issues, such as those related to the underground economy, economic inequality, and consumer behaviour. Students will apply the concepts of economic thinking, the economic inquiry process, and economic models to investigate various economic issues and structures and to analyse the impact of economic decisions, including their own decisions, at the individual, community, and national levels. **Prerequisite: Canadian History since World War I, Grade 10, Academic or Applied**

# ***COOPERATIVE EDUCATION***

## ***(2 CREDITS or 4 CREDITS)***

### **What is Co-op?**

Co-operative Education is a valuable learning experience that takes place in the community. Students have the opportunity to “test drive a career” prior to postsecondary school to help them develop a career path. Their co-op experiences help the students to develop essential skills and work habits necessary for success within the context of school and the world of work. Students could be working in almost any type of business or community organization (e.g. vet clinic, elementary school, daycare, retail, restaurant, auto body, auto mechanics, welding, etc.).

A student’s experiential learning program is credit bearing and may be timetabled for either half of the school day (2 credits), or the entire day (4 credits). Credits are granted based on in class assignments, employer evaluations, and successful attendance at the work placement. As a result, strong attendance is mandatory. Register for one of the co-op courses listed below. Students are advised to speak with a guidance counsellor or one of the co-op teachers to discuss the suitability of this program.

This course consists of a community-connected experience and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning at school and beyond, today and in the future, as well as in their education and career/life planning. Within the context of the community-connected experience, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.

**Prerequisite:** None

### **Why Take Co-op?**

Cooperative education provides students with an opportunity to enhance their academic life at Nottawasaga Pines Secondary School and supports student decisions pertaining to choices in post-secondary workplace or education programs (e.g. apprenticeship, college, university). Students will pursue their interests in an appropriate workplace and develop knowledge, skills and attitudes that are essential in today’s working world. In addition, the Ontario Youth Apprenticeship Program (OYAP) provides an opportunity for students interested in pursuing a career in apprenticeable trades to begin their pathway prior to completing secondary school.

Students are required to arrange their own transportation to their work site. Some cooperative education placements may involve costs for medical/immunizations, security checks, safety equipment or special clothing. These costs are the responsibility of the student and the parent/guardian. It should also be understood that placements in some fields of work are very limited and that the first placement choice cannot be guaranteed. Students who are interested in Co-op must complete the following steps prior to beginning the program.

#### ***GWL302 – 2 Credit Cooperative Education Program:***

---

The student is at the workplace for a total of 2.5 hours for either the morning or afternoon portion of each school day. The student is enrolled in classes at the school for the other part of the school day.

#### ***GLN404 – 4 Credit Cooperative Education Program:***

---

The student is at the workplace for a full school day(5 hours).

# ENGLISH

## ***ENG4U1: English, Grade 12, University Preparation***

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace. **Prerequisite: English, Grade 11, University Preparation**

## ***ENG4C1: English, Grade 12, College Preparation***

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace. **Prerequisite: English, Grade 11, College Preparation**

## ***ENG4E1: English, Grade 12, Workplace Preparation***

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will analyse informational, graphic, and literary texts and create oral, written, and media texts in a variety of forms for workplace-related and practical purposes. An important focus will be on using language accurately and organizing ideas and information coherently. The course is intended to prepare students for the workplace and active citizenship. **Prerequisite: English, Grade 11, Workplace Preparation**

## ***EW4U1: The Writer's Craft, Grade 12, University Preparation***

This course emphasizes knowledge and skills related to the craft of writing. Students will investigate models of effective writing; use a workshop approach to write a variety of works; and make considered decisions for improving the quality of their writing. They will also complete a creative or analytical independent study project and investigate opportunities for publication and for writing careers. **Prerequisite: English, Grade 11, University Preparation**

## ***EW4C1: The Writer's Craft, Grade 12, College Preparation***

This course emphasizes knowledge and skills related to the craft of writing. Students will investigate models of effective writing; use a workshop approach to write a variety of works; and make considered decisions for improving the quality of their writing. They will also complete a creative or analytical independent study project and investigate opportunities for publication and for writing careers. **Prerequisite: English, Grade 11, College Preparation**

## ***OLC4O1: Ontario Secondary School Literacy Course, Grade 12***

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing. **Eligibility requirement:** Students who have been eligible to write the OSSLT at least twice and who have been unsuccessful at least once are eligible to take the course.

## ***ENGLISH as a SECOND LANGUAGE***

### ***ESL: English as a Second Language Courses***

These courses are designed for English language learners who have had opportunities to develop language and literacy skills in their own language appropriate to their age or grade level. They can read and write in their own language within the expected range for students of their age in their own country. They can build on their existing first-language skills when learning English in an ESL program. The five ESL courses are based on levels of proficiency in English. Depending on learners' previous experience with English, students may be placed in ESL Level 1, 2, 3, 4, or 5.

## ***HEALTH AND PHYSICAL EDUCATION***

### ***PAF401: Personal and Fitness Activities (co-ed), Open***

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively. This course will focus on activities to promote lifelong physical and mental wellness in a fitness center atmosphere. Students will learn to develop and revise personal fitness plans to suit their own needs, as well as assess and monitor their health related fitness during physical activity. The development of these skills will start students on a path to achieving their personal wellness goals both now and in the future.

### ***PPL401: Healthy Active Living Education(co-ed), Grade 12, Open***

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

### ***PSK4U1: Introductory Kinesiology (formerly Exercise Science), Grade 12, University Preparation***

This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sports, and the factors that influence an individual's participation in physical activity. The course prepares students for university programs in physical education, kinesiology, recreation, and sports administration. **Prerequisite: Any Grade 11 university or university/college preparation course in science, or any Grade 11 or 12 open course in health and physical education**

## INTERDISCIPLINARY STUDIES

### ***IDC4U - Yearbook (BLOCKY)***

This course is designed for those students interested in learning the skills of journalism, communications, and publishing as they pertain to the preparation of the annual school yearbook. Such areas as the elements of a good page design, and photography skills will be studied. Students will explore the importance of using responsible practices when engaged in the creative process. Students will develop the skills necessary to create and interpret media art works. **Prerequisite: None**

## LANGUAGES

### ***FSF4U1: Core French, Grade 12, University Preparation***

This course draws on a variety of themes to promote extensive development of French language skills. Students will consolidate their oral skills as they discuss literature, culture, and current issues. They will read a variety of texts and will write a formal essay. The use of correct grammar and appropriate language conventions in both spoken and written French will be emphasized throughout the course. **Prerequisite: Core French, Grade 11, University Preparation**

## MATHEMATICS

### ***MCV4U1: Calculus and Vectors, Grade 12 University Preparation***

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course. **Note: The Advanced Functions course (MHF4U) must be taken prior to or concurrently with Calculus and Vectors (MCV4U).**

### ***MDM4U1: Mathematics of Data Management, Grade 12, University Preparation***

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analysing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest. **Prerequisite: Functions, Grade 11, University Preparation, or Functions and Applications, Grade 11, University/College Preparation**

### ***MHF4U1: Advanced Functions, Grade 12, University Preparation***

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs. **Prerequisite: Functions, Grade 11, University Preparation, or Mathematics for College Technology, Grade 12, College Preparation**

### **MAP4C1: Foundations for College Mathematics, Grade 12, College Preparation**

This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyse data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades.

**Prerequisite:** Foundations for College Mathematics, Grade 11, College Preparation, or Functions and Applications, Grade 11, University/College Preparation

### **MCT4CV\*: Mathematics for College Technology, College eLearning**

This course enables students to extend their knowledge of functions. Students will investigate and apply properties of polynomial, exponential, and trigonometric functions; continue to represent functions numerically, graphically, and algebraically; develop facility in simplifying expressions and solving equations; and solve problems that address applications of algebra, trigonometry, vectors, and geometry. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for a variety of college technology programs. **Prerequisite:** Functions and Applications, Grade 11, University/College Preparation, or Functions, Grade 11, University Preparation

**This course is offered online only.**

### **MEL4E1: Mathematics for Work and Everyday Life, Grade 12, Workplace Preparation**

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will investigate questions involving the use of statistics; apply the concept of probability to solve problems involving familiar situations; investigate accommodation costs, create household budgets, and prepare a personal income tax return; use proportional reasoning; estimate and measure; and apply geometric concepts to create designs. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. **Prerequisite:** Mathematics for Work and Everyday Life, Grade 11, Workplace Preparation

## **SCIENCE**

### **SBI4U1: Biology, Grade 12, University Preparation**

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields. **Prerequisite:** Biology, Grade 11, University Preparation

### **SBI4UP: Biology Advanced Placement , Grade 12 University Preparation**

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields. **The Advanced Placement (AP) Biology (SBI4UP) course is an accelerated and advanced level program designed to meet the rigorous requirements of the American College Board examination in May, allowing students to experience university level programming while still in high school.** **Prerequisite:** Biology, Grade 11, University Preparation

#### **SCH4U1: Chemistry, Grade 12, University Preparation**

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment. **Prerequisite: Chemistry, Grade 11, University Preparation**

#### **SCH4C1: Chemistry, Grade 12, College Preparation**

***\*This course is offered every other year\****

***Next offered in 2022-23***

This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it relates to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment. **Prerequisite: Science, Grade 10, Academic or Applied**

#### **SPH4U1: Physics, Grade 12, University Preparation**

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment. **Prerequisite: Physics, Grade 11, University Preparation**

#### **SPH4C1: Physics Grade 12 College Prep**

***\*This course is offered every other year\****

***Next offered in 2023-24***

This course develops students' understanding of the basic concepts of physics. Students will explore these concepts with respect to motion; mechanical, electrical, electromagnetic, energy transformation, hydraulic, and pneumatic systems; and the operation of commonly used tools and machines. They will develop their scientific investigation skills as they test laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment. **Prerequisite: Grade 10 Science, Academic or Applied**

#### **SES4U1: Earth and Space Science, Grade 12 University Preparation**

This course develops students' understanding of Earth and its place in the universe. Students will investigate the properties of and forces in the universe and solar system and analyse techniques scientists use to generate knowledge about them. Students will closely examine the materials of Earth, its internal and surficial processes, and its geological history, and will learn how Earth's systems interact and how they have changed over time. Throughout the course, students will learn how these forces, processes, and materials affect their daily lives. The course draws on biology, chemistry, physics, and mathematics in its consideration of geological and astronomical processes that can be observed directly or inferred from other evidence.

**Prerequisite: Science, Grade 10, Academic**

## **SOCIAL SCIENCES AND HUMANITIES**

### ***HNB4M1: The World of Fashion, College University Preparation***

This course gives students the opportunity to explore the world of fashion. Students will learn how to create a fashion product using various tools, techniques and technologies while developing their practical skills. Students will learn about various factors that affect the global fashion industry, the needs of specialized markets, and the impact of fibre and fabric production and care. In addition, they will learn about social and historical influences on fashion. Students will apply research skills when investigating aspects of the fashion world. **Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.**

### ***HHS4C1: Families in Canada, College Preparation***

This course enables students to develop an understanding of social science theories as they apply to individual development, the development of intimate relationships, and family and parent-child relationships. Students will explore a range of issues relating to the development of individuals and families in contemporary Canadian society as well as in other cultures and historical periods. They will develop the investigative skills required to conduct research on individuals, intimate relationships, and parent-child roles and relationships in Canada. **Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies**

### ***HHS4U1: Families in Canada, University Preparation***

This course enables students to draw on sociological, psychological, and anthropological theories and research to analyse the development of individuals, intimate relationships, and family and parent-child relationships. Students will focus on issues and challenges facing individuals and families in Canada's diverse society. They will develop analytical tools that enable them to assess various factors affecting families and to consider policies and practices intended to support families in Canada. They will develop the investigative skills required to conduct and communicate the results of research on individuals, intimate relationships, and parent-child relationships. **Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies**

### ***HFA4U1: Nutrition and Health, University Preparation***

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health. **Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies**

### ***HPD4C1: Working With School Aged Children and Adolescence, College Preparation***

This course prepares students for occupations involving school-age children and adolescents. Students will study a variety of theories about child behaviour and development, and will have opportunities for research and observation and for practical experiences with older children. Students will become familiar with occupational opportunities and requirements related to working with older children and adolescents. They will develop research skills used in investigating child and adolescent behaviour and development. **Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.**

### ***HSB4U1: Challenge and Change in Society, Grade 12, College Preparation***

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change. **Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies**

## ***TECHNOLOGICAL EDUCATION***

### ***TGJ4M1: Communications Technology, Grade 12, University/College Preparation***

This course enables students to further develop media knowledge and skills while designing and producing projects in the areas of live, recorded, and graphic communications. Students may work in the areas of TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also expand their awareness of environmental and societal issues related to communications technology, and will investigate career opportunities and challenges in a rapidly changing technological environment. **Prerequisite: Communications Technology, Grade 11, University/College Preparation**

### ***TMJ4E1: Manufacturing Technology, Grade 12, Workplace Preparation***

This project-driven, hands-on course builds on students' experiences in manufacturing technology. Students will further develop knowledge and skills related to the use of engine lathes, milling machines, welding machines, and other tools and equipment as they design and fabricate solutions to a variety of technological challenges in manufacturing. Students may also have opportunities to acquire industry-standard training and certification. Students will expand their awareness of environmental and societal issues and of career opportunities in the manufacturing industry. **Prerequisite: Manufacturing Technology, Grade 11, Workplace Preparation**

### ***TCJ4E1: Construction Technology, Grade 12, Workplace Preparation***

This course enables students to further develop technical knowledge and skills related to residential construction and to explore light commercial construction. Students will continue to gain hands-on experience using a variety of materials, processes, tools, and equipment; create and interpret construction drawings; and learn more about building design and project planning. They will expand their knowledge of terminology, codes and regulations, and health and safety standards related to residential and light commercial construction. Students will also expand their awareness of environmental and societal issues related to construction technology, and will explore entrepreneurship and career opportunities in the industry that may be pursued directly after graduation.

**Prerequisite: Construction Technology, Grade 11, Workplace Preparation**

### ***TWJ4E1: Custom Woodworking, Grade 12, Workplace Preparation***

This course enables students to further develop knowledge and skills related to the planning, design, and construction of residential and/or commercial cabinets and furniture. Students will gain further experience in the safe use of common woodworking materials, tools, equipment, finishes, and hardware, and will learn about the entrepreneurial skills needed to establish and operate a custom woodworking business. Students will also expand their awareness of health and safety issues and environmental and societal issues related to woodworking, and will explore career opportunities that may be pursued directly after graduation.

**Prerequisite: Custom Woodworking, Grade 11, Workplace Preparation**

**TXJ4E1: Hairstyling and Aesthetics, Grade 12, Workplace Preparation**

This course enables students to develop increased proficiency in a wide range of hairstyling and aesthetics services. Working in a salon/spa team environment, students will strengthen their fundamental cosmetology skills and develop an understanding of common business practices and strategies in the salon/spa industry. Students will also expand their understanding of environmental and societal issues and their knowledge of postsecondary destinations in the hairstyling and aesthetics industry. **Prerequisite: Hairstyling and Aesthetics, Grade 11, Workplace Preparation**

**TFJ4C1: Hospitality and Tourism, Grade 12, College**

This course enables students to further develop knowledge and skills related to the various sectors of the tourism industry. Students will demonstrate advanced food preparation and presentation skills; increase health and wellness knowledge; develop tourism administration and management skills; design and implement a variety of events or activities; and investigate principles and procedures that contribute to high-quality customer service. Students will expand their awareness of health and safety issues, environmental and societal issues, and career opportunities in the tourism industry. **Prerequisite: Hospitality and Tourism, Grade 11, College Preparation**

**TFJ4E1: Hospitality and Tourism, Grade 12, Workplace Preparation**

This course enables students to further develop knowledge and skills related to the food and beverage services sector of the tourism industry. Students will demonstrate proficiency in using food preparation and presentation tools and equipment; plan nutritious menus, create recipes, and prepare and present finished food products; develop customer service skills; and explore event and activity planning. Students will expand their awareness of health and safety practices, environmental and societal issues, and career opportunities in the food and beverage services sector. **Prerequisite: Hospitality and Tourism, Grade 11, Workplace Preparation**

**TDJ4M1: Technological Design, Grade 12, University/College Preparation**

This course introduces students to the fundamentals of design advocacy and marketing, while building on their design skills and their knowledge of professional design practices. Students will apply a systematic design process to research, design, build, and assess solutions that meet specific human needs, using illustrations, presentation drawings, and other communication methods to present their designs. Students will enhance their problem-solving and communication skills, and will explore career opportunities and the postsecondary education and training requirements for them. This course will have an emphasis on robotics and engineering. **Prerequisite: Technological Design, Grade 11, University/College Preparation**

**TTJ4E1: Transportation Technology: Vehicle Maintenance, Grade 12 Workplace Preparation**

This course introduces students to the servicing, repair, and maintenance of vehicles through practical applications. The course is appropriate for all students as a general interest course to prepare them for future vehicle operation, care, and maintenance or for entry into an apprenticeship in the motive power trades. Students will develop an awareness of environmental and societal issues related to transportation, and will learn about careers in the transportation industry and the skills and training required for them. **Prerequisite: None**

# EDUCATIONAL PLAN

“Begin with the end in mind”

Grade 9 Year 1 8 credits	Grade 10 Year 2 8 credits	Grade 11 Year 3 8 credits	Grade 12 Year 4 6 credits	Year 5
Choose Locally Developed, Applied, Academic or Open Courses	Choose Locally Developed, Applied, Academic or Open Courses	Choose Workplace, College, University/College, University or Open Courses	Choose Workplace, College, University/College, University or Open Courses	If needed, complete required courses for graduation.
1. English	1. English	1. English	1. English	
2. Math	2. Math	2. Math	2.	
3. Science	3. Science	3. Group 1 (any grade)	3.	
4. Geography	4. History	4. Group 2 (any grade)	4.	
5. French	5. Civics & Careers	5. Group 3 (any grade)	5.	
6. Health & Physical Ed. (in any grade)	6.	6.	6.	
7. Arts (in grade 9 or 10)	7.	7.		
8. Optional Course	8.	8.		30 credits needed for an OSS Diploma

The 18 compulsory course requirements are in the grey shaded areas.

The 12 optional credit requirements are in white.

Within these choices, students must have one more credit from each of the following 3 groups:

- ✓ Group 1– 1 additional credit in English, or French as a second language or a Native language or a classical or an international language or social sciences and humanities or Canadian and world studies or guidance and career education or cooperative education
- ✓ Group 2– 1 additional credit in health and physical education or the arts, or business studies, or cooperative education
- ✓ Group 3– 1 additional credit in science (grade 11 or 12), or technological education, or computer studies cooperative education

**\*A maximum of 2 of the 3 additional compulsory credit requirements for groups 1, 2 and 3 may be met with credits earned through Cooperative Education.**
